Canon

Software Compatibilities for Canon
CR-180
CHECK TRANSPORT

The following organizations included in this brochure attest to the compatibility between their software applications and the Canon CR-180 Check Transport.

Company	Description	Name of Product
ADVANCED FINANCIAL SOLUTIONS	*Advanced Financial Solutions (AFS), a Metavante company, delivers high-quality image-based check processing solutions to the financial services industry. AFS was one of the first companies to offer image-item processing technology based on the Microsoft® Windows®.NET operating environment. AFS ImageVision supports the electronic image-capture and processing of checks and payments. For more information, visit www.afsimage.com.*	ImageVision 2k3 (Sorter module version 5.0.1.6)
ANDERSON IMAGING GROUP	*Anderson Imaging Group is a scanning software developer. AIG Scan software captures and processes check and remittance images. Featuring a modular architecture, AIG Scan is custom configured to match job requirements. Features include computer-assisted data entry, Bar Code Recognition, ICR, bidirectional linking to SQL/ODBC databases, and MICR code line parsing. For more information, visit www.andersonimaging.com.*	AIG Scan v2.0, v2.1
APERTA	*Adopting Check 21, truncation, or ARC does not require expensive transports and hardware. Together, Aperta's check and remittance processing suite and the Canon CR-180 can introduce these new initiatives into your existing processing. Aperta's solutions integrate with current workflow, allowing adoption of key-from-image and electronic processing, reduced operational costs, widened processing windows, or the option to go straight to truncation at an affordable cost. For more information, visit www.aperta.com.*	VPTA+, VRPA+ Release version 4
AQURACY CORPORATION	*AQURACY Corporation is a supplier of check, remittance, microfilm replacement, and lockbox processing softwares. They offer affordable check processing solutions to any organization that processes between 200 to more than 10,000 checks or payment transactions per day. AQURIT® software reduces operating costs, improves processing accuracy, and delivers unsurpassed reliability. For more information, visit www.aquracy.com.*	AQURIT® v4.0
AUDIOTEL	*From microfilm replacement to full-blown POD/Check Imaging, AudioTel has the solutions that are affordable, time tested, and full featured. Responding to the Check 21 Act's needs and migration to Web-based applications has shown AudioTel's ability to meet the wants and needs of the market. For more information, visit www.audiotel.com or call 972-239-4486.*	Genysis Imaging
BANKWARE, A DIVISION OF FIDELITY INTEGRATED FINANCIAL SOLUTIONS	*ImageCentre™, the financial industry's first and only complete browser-based check imaging, document imaging, remittance imaging, and COLD solution, has been integrated with the Canon CR-180 for branch image capture, teller image capture, microfilm replacement, and back-office image capture and processing. For more information, contact BankWare at 205-408-9998 (x273), via e-mail at info@bankware.net, or via the Web at www.bankware.net.*	ImageCentre v2.0, v3.0
BUSINESS IMAGING SYSTEMS, INC.	*Business Imaging Systems, Inc. offers a variety of document capture, document management, and data distribution products and services, such as check and document scanners from leading hardware manufacturers, software development, systems integration, professional services, and data conversion services. For more information, visit www.bisok.com or call 405-507-7000.*	Mobilis Professional and MasterScan Check Capture – v2.0 or later
C&A ASSOCIATES, INC.	*C&A Associates software operates with the CR-180 as a microfilm replacement system that enables customers to research prior days' images, and an advanced system to produce cash letters, research either by date folder or by multiple days (called global research), and full proof of deposit (POD) that includes cash letters and transfer to a host system. For more information, visit www.caassociates.com.*	ImageChex Express Lite and ImageChex Express Advanced

Company	Description	Name of Product
CAPTOVATION INCORPORATED	*Captovation Incorporated specializes in the design and development of document and browser-based capture products for the electronic document management industry. These software products provide paper-intensive organizations with the ability to streamline and tailor the document or check capture process to meet their needs. eCapture, the company's flagship product, is a suite of document capture tools for the enterprise. For more information, visit www.captovation.com.*	Captovation Check Capture v4.4
CARREKER	*Carreker addresses the challenges of Check 21 with their Source Capture suite of applications for distributed image capture. Source Capture, using image scanners like the Canon CR-180, will allow banks to take the image capture process out to the original source of items, such as corporate/merchant locations, bank branches, bank cash vaults, at an ATM, or at a point of sale. For more information, visit www.carreker.com.*	Source Capture
CHEXDIRECT, INC.	*ChexDirect provides integrated Automated Clearing House (ACH) billing solutions to corporations seeking to remove paper from the workflow of AR/AP departments. ChexDirect employs the Canon CR-180 to process mailed payments using MICR/OCR/ICR technology, posting payments in high speed, and processing all payments through the ACH network. Also included is the ability to transfer vendor and payroll payments and allow consumer payments via the client's Web site. For more information, visit www.chexdirect.com.*	ChexDirect ARC
CONTACT INNOVATIONS INC.	*A pioneer and leading North American solutions provider in desktop check imaging, Contact Innovations Inc., based in Toronto, Canada, now supports the Canon CR-180 Check Transport. Combined with their ImageArchive® line of products, the CR-180 allows financial institutions and other check handlers to quickly scan, index, store, and retrieve items within seconds and at an affordable price. For more information, visit www.contactinnovations.com.*	IA Check and ImageArchive Cheque v5.64.0305 to current release
COWWW SOFTWARE	*COWWW Software provides a complete information archive and delivery system for banks, credit unions, and other financial institutions. COWWW Software's archive technology is 100% browser-based and provides access to check images, statements, documents, and reports. For more information, visit www.cowww.com.*	COWWWScan v1.3.0
DATA FINANCIAL BUSINESS SERVICES, INC.	*Data Financial is a 21-year-old banking equipment and software vendor specializing in check image processing systems. They offer Draft Control Plus (DCP) software for automated remittance processing with ACH conversion, and DCPS software for full automated POD systems for banking and credit union applications with one to 500 branches. For more information, visit www.check21solutions.com.*	ChekScan Pro and Draft Control Plus
DATAMONICS	*Datamonics Check Pro 21 provides end-users with a fast and powerful tool available to capture check images, read MICR lines, perform POD/IQD, and virtual-sort check images and post data into an unlimited number of databases for multiyear storage, research, and presentment (X9.37) to banks of origin directly or via the Federal Reserve, service bureaus, etc. For more information, visit www.datamonics.com.*	Check Pro 21 Remittance Pro™ 21 v2.0
DMA ASSOCIATES, INC.	*DMA Associates is a data processing and software development firm that services the community bank and credit union market. Services range from complete data processing systems (teller, mainframe, imaging, ATM, etc.) to customized software applications. Their check imaging software, ItemSTOR, uses the latest Canon scanners, including the CR-180, to capture, archive, and index check images. For more information, visit www.itemstor.com.*	ItemSTOR v2.5.27

Company	Description	Name of Product
DOCUWARE	**DOCUWARE** *DocuWare is a worldwide leading software company for integrated document management with more than 5,500 installations and tens of thousands of users in over 50 countries. Regardless of format or source, DocuWare organizes any type of document in a central document pool—records, letters, drawings, files, or e-mails—and allows users to scan, index, transmit, display, edit and print, fax, or e-mail them. For more information, visit www.docuware.com.*	DocuWare 4.6
Financialware	**FINANCIALWARE** *Financialware offers a revolutionary document management and electronic check product, Active:View. It allows fast, easy access and search-and-delivery capabilities for checks, reports, statements, and documents of all kinds. Built with .NET technology, this browser-based product fully integrates to the financial institutions' existing applications. For more information, visit www.financialware.com.*	Active:View®
INFO DYNAMICS	**INFODYNAMICS, INC.** *InfoDynamics is the creator of inCheck Software, which allows customers to access check information effortlessly. InCHECK, together with the Canon CR-180, provide customers with just-in-time, on-site scanning of checks and deposit documents, with the images being saved electronically on the customer's server with customizable features. For more information, visit www.infod.com.*	Intact v2.80/ inCHECK v2.80
I.S.A.	**I.S.A.** *I.S.A.'s desktop imaging products allow integrated capture, archival, and retrieval of checks from multiple sources, including paper and microfilm. Remittance attachments may be captured on regular paper scanners while checks are captured from check, paper, and/or microfilm scanners. Data sources include the MICR line, machine and hand-print recognition, and CAR file integration for microfilm sources. For more information, visit www.isausa.com.*	Isalms, Isalms.NET
Jaguar SOFTWARE	**JAGUAR SOFTWARE DEVELOPMENT, INC.** *Jaguar Software, headquartered in Sullivan, Illinois, is committed to developing and delivering check imaging and document management systems for any size financial institution. Their MirrorImage Check Imaging System is a sophisticated, modular, and user-friendly software suite aimed at providing solutions ranging from microfilm replacement to branch capture and complete image POD. For more information, visit www.jaguarsoftware.com.*	MirrorImage
JDS JARA Diversified Services	**JARA DIVERSIFIED SERVICES** *JARA DIVERSIFIED SERVICES (JDS) offers check-processing-based solutions for Check 21 and electronic check conversion (ECC). Draft Conversion Plus does Check 21 and ECC processing for accounts receivable and retail businesses. Draft Control Processing System for financial institutions is scalable to full POD processing from microfilm replacement, and supports both branch and remote capture. For more information, visit www.jaradiversifiedservices.com.*	Draft Conversion Plus version 3.2 or later Draft Control Processing System version 3.2 or later
LASERFICHE a division of Compulink Management Center, Inc.	**LASERFICHE** *LaserFiche document management, imaging, and DoD 5015.2-certified records management solutions help 21,000 organizations, worldwide, run smarter. LaserFiche solutions streamline operations, enhance the security of business-critical information, and reduce costs associated with paper-handling, document storage, and regulatory compliance programs. For more information, visit www.laserfiche.com.*	LaserFiche v.7
MICR Automation, Inc.	**MICR AUTOMATION, INC.** *MICR Automation utilizes the Canon CR-180 as the primary entry device for MICR items. Image proofing with CAR/LAR may be performed at the branch or at a central location, and complete Check 21 image presentment and acceptance is supported. MICR Automation offers low-cost, self-hosted, super-secure Internet image support that reduces account support expenses while maximizing customer satisfaction. For more information, visit www.micrautomation.com.*	MICR Image 21 v1.10.007

Company	Description	Name of Product
NATIONAL SOURCE ONE	**NATIONAL SOURCE ONE** *National Source One offers a complete suite of host independent branch automation software. Their thirteen solutions include teller automation and account origination as well as check imaging. GoldCheck21 is a full-featured item processing package designed to provide banks with the power and flexibility to fulfill proof processing requirements at an affordable price. CAR/LAR support eliminates the time-consuming encoding of documents prior to capture. For more information, visit* **www.nationalsourceone.com.**	GoldCheck 21
PST Precision Software Technologies, Inc.	**PRECISION SOFTWARE TECHNOLOGIES, INC.** *EZ-Scan™ software is a versatile check imaging solution with support for the new Canon CR-180. EZ-Scan, together with the CR-180, capture front and back images as well as MICR data at a blazing 180 checks per minute. With EZ-Scan, one can easily organize captured data and images to provide not just microfilm type storage, but also full searching, printing, e-mailing, reporting, and exporting capabilities. For more information, visit* **www.pstinc.com** *or contact PST at 813-818-8755.*	EZ-Scan v1.0
SCANPOINT	**SCANPOINT, INC.** *ScanPoint is a leading provider of document management solutions to a variety of corporate business sectors. Its EasyFile™ product includes a complete set of EDM functions, including capture, index, store, retrieve, and archive, and integrates seamlessly with Canon DR-Series Scanners and the CR-180 Check Transport. For more information, visit* **www.scanpoint-usa.com.**	EasyFile Check21
TECHNOLOGY MANAGEMENT RESOURCES™	**TECHNOLOGY MANAGEMENT RESOURCES, INC.** *Citation e-Remit is an image-based, modular payments processing solution designed to automate the scanning, capture, balancing, reporting, archival, and retrieval of lockbox/remittance transactions. Citation e-Remit's modular design easily facilitates account and volume growth as well as customization of processes to either distributed or consolidated work environments. For more information, visit* **www.tmr-web.com.**	Citation e-Remit version 5.0
TMSSequoia	**TMSSEQUOIA** *TMSSequoia designs image enhancement toolkits and applications for color, grayscale, and bitonal document image enhancement, forms processing, and image viewing. The Prizm browser-based Viewer is a powerful TIFF, JPEG, and PDF viewer specifically designed to integrate with existing applications and databases to add document image and PDF viewing, printing, and annotations capabilities to corporate intranet and extranet Web sites. For more information visit,* **www.tmssequoia.com.**	Prizm IP v1.5 Prizm IQA ScanFix 4.2 Prizm Viewer 7.04
VSOFT	**VSOFT** *Vsoft Corporation is a global information technology and solutions provider of check imaging and data management software. Vsoft's Branch Item Capture is a branch and teller-level application that captures images and data for central processing. It enables users to capture images at branches rather than transporting them to the central operations center. As items are captured at the branch, the item image and MICR data are sent electronically to a central processing location. For more information, visit* **www.vsoftcorp.com.**	eDesk Capture 5.0

Disclaimer: If a software version is not provided, the compatibility has been tested with software applications without a version specification at the time of compatibility testing, or otherwise, with all current releases/versions of the software products. Please contact individual software providers for more detailed information.
