*1 Ink droplets can be placed with a pitch of 1/4800 inch at minimum.
*2 Photo print speed is measured as soon as first page begins to feed into printer and will vary depending upon a number of factors.
*3 FSOT and ESAT ADF copy speed on plain paper is measured based on the test standard of ISO/IEC FCD 24735. ADF copy speed may vary depending on document complexity, copy mode, page coverage, type of paper used, etc.
*4 "ISO Standard Speed" represents the document print and copy speed measured at default quality setting.
*5 ISO/IEC FCD 24734, FCD 24735 defines the default print and copy speed measurement methods.
 • Print speeds are the averages of ESAT in Office Category Test for the default simplex mode, ISO/IEC FCD 24734.
 • Copy speed is the average of FCOT, ISO/IEC FCD 24735 Annex D.
 • ADF copy speed is the average of ESAT in General Performance Test for the default simplex mode, ISO/IEC FCD 24735.

ESAT (Estimated Saturated Throughput): Average number of pages per minute at default speed (monochrome & color)
FCOT (First Copy Out Time): 1st page copy speed (without ADF) shall be described in "seconds"
ESAT (Estimated Saturated Throughput) for Copying: Average number of pages per minute in Simplex mode (one-sided copy) at default print speed (color only)

SOHO

ISO SPEED STANDARDS –
A UNIFORM MEASURE FOR ALL

Canon has adopted new ISO (International Organization for Standardization) Productivity Standards governing print & copy speed for PIXMA Inkjet Photo Printers, Photo and Office All-In-One Printers.

Under the new ISO/IEC FCD 24734 and ISO/IEC FCD 24735 standards, participating print device vendors will adopt a common measurement system for published print and copy speed performance. Users will find it easier than ever to choose their perfect PIXMA printer according to their printing and copying needs.

- ISO/IEC FCD 24734 defines the measuring method of print speed on plain paper
- ISO/IEC FCD 24735 defines the measuring method of copy speed on plain paper, for printing devices with / without an ADF (Auto Document Feeder)

For details on the new ISO print productivity standards, please visit **www.canon-asia.com**

The PIXMA MX338 & MX328 – The Convenient Way To Get More Done

Increase the quality, efficiency and productivity of your business with the PIXMA MX338 & MX328 Office All-In-One Inkjet Printers. These versatile machines offer print, copy, scan and fax capabilities – the ideal solution for your SOHO setup. Plus, a 30-sheet ADF makes everything faster and more convenient. Whatever you do, you'll get more done with the PIXMA MX338 & MX328.

HIGH-QUALITY PRINTING

FINE
Full-photolithography Inkjet
Nozzle Engineering

Four-Color Ink System – Both Dye-Based and Pigment-Based Inks

- New dye-based inks greatly improve color expression and increase print longevity
- Pigment black enhances color contrast and ensures professional-quality text

The Hybrid System – Sharp Text Even On Images

- Pigment black ink ensures sharp black text and lines even when printed over an image
- The edges of photos and other graphic images are de-emphasized for a smooth, natural look
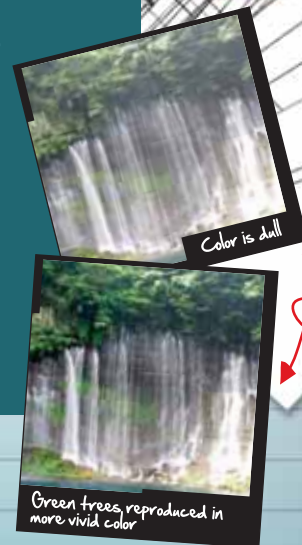

Sharp black text even on images

Auto Photo Fix* – The Ideal Solution For Every Image

- Recognizes the type of photo taken – a portrait, scenery, etc.
- Automatically makes the ideal correction based on image type
- Optimizes color intensity, tone and brightness for a naturally perfect photo

Available in Easy-PhotoPrint EX

Color is dull

Green trees, reproduced in more vivid color

VERSATILE SCANNING

Auto Scan Mode

• Scan and save at the touch of a button: Auto Scan Mode recognizes the type of original then makes all suitable settings

Scan To Memory Function – No Need For A Computer

• Save scanned data directly to USB flash memory

• Use the ADF to scan multiple documents; create a multiple-page PDF

Time-saving ADF

• Load up to 30 sheets in the automatic document feeder

• Enhances work efficiency and improves productivity

CONVENIENT COPYING

The ability to make copies quickly and conveniently is a tremendous advantage at home or in the office. The PIXMA MX338 & MX328 offer excellent copying capabilities that will make your life so much easier.

New Copy Functions To Enhance Quality & Productivity*

- **Binding Margin Copy** – bind documents without covering text or images on the left side of the page
- **Punch Hole Removal Copy** – eliminates unsightly punch holes from copies
- **Print Date/Page Number Copy** – print the date and/or page number on each copy

Available only in PIXMA MX338

Gutter Shadow & Frame Erase – Better Looking Copies

- Shadow Erase eliminates "gutter" shadows that often occur in copies made from books and magazines
- Frame Erase enhances copies and saves black ink by removing the black border that sometimes appears on copies from thick sources

With Frame Erase

Without Frame Erase

Dual Color Gamut Processing – More Faithful Color Reproduction

D.C.G.
Processing Technology

- Takes into account the type of original (photo or document) and paper (copy, photo or plain)
- Creates optimal balance between color differences and gradation
- Eliminates the differences between original and copies

SUPER G3 HIGH-SPEED FAXING – FAST & EFFICIENT

Faxing is a great convenience at the office or at home. With the PIXMA MX338 & MX328 you'll enjoy fast, efficient faxing whenever you need it.

- Supports the Super G3 standard for high-speed electronic transmissions
- Fax an A4-size document in approximately three seconds
- Increases productivity and lowers your phone bill

New Security Features

- **Fax Number Re-Entry** – After dialing, sender re-enters number to make sure it's correct
- **Check RX Fax Info** – If dialed number and recipient's number are not the same, faxing is halted
- **Caller Rejection** – Allows user to specify whether to accept or reject certain types of calls
- **Fax Reception Reject** – Allows user to specify whether to accept or reject certain types of faxes

New Extra Fine Mode	ADF Faxing – Up To 30 Pages	Reception Memory	Coded Speed Dial
• Uses higher resolution when sending faxes so that all details are captured	• Fax several pages at once by loading them into the Automatic Document Feeder • Holds up to 30 sheets of regular A4 paper for convenient and continuous faxing	• Stores up to 50 faxed pages in the Memory Reception • Ensures that you won't miss receiving a fax	• Stores up to 20 locations using the Coded Speed Dial function • Fax numbers are easily recalled using letters or numbers from the keypad

New Album - Easy-PhotoPrint EX

File   Edit   View   Help
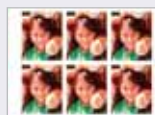

EASY-PHOTOPRINT EX – IT'S SO EASY TO DO SO MUCH MORE!

Print Photos Easily

Simply select paper size, layout and then print. Borderless photos are so easy!

Make An Album

Create your very own customized photo album using your favorite images. Just select a layout and the photos you want to include.

Create A Personalised Photo Calendar

Select a layout, dates, colors and fonts then add your best images. Now there are even more layouts and paper sizes from which to choose!

Print Fun Photo Stickers

Use photos taken with a digital camera, or any other images, to make one-of-a-kind photo stickers and have fun sticking them anywhere!

Get Creative With Layout Print

Choose from a variety of paper sizes and layouts. You can even add text to your photos.

Check Out The Library

Access your albums and other projects created with Easy-PhotoPrint EX.

Auto Photo Fix

Auto Photo Fix recognises the type of photo taken – portrait, scenery, etc – then automatically corrects red eye effect and adjusts color intensity, tone and brightness to provide better looking photo output.

Rotate Objects

Text and images can now be rotated freely so you can get the layout you really want.

Click "Free Rotate" button

PICTBRIDGE CAMERA DIRECT PRINTING – QUICK & CONVENIENT

- Connect any Canon or PictBridge-compatible digital camera or camcorder
- Print high-quality photographs quickly and easily without a computer

WIRELESS PRINTING VIA BLUETOOTH – CONVENIENT CONNECTIONS

- Connect optional BU-30 Bluetooth adapter to print wirelessly from a Bluetooth-enabled camera phone or PDA from up to 10m away

SELF-OPENING PAPER OUTPUT TRAY – NO DELAYS

- Tray opens automatically before every print job
- Eliminates frustrating delays and paper jams

MORE PRINTING OPTIONS

- Template Print – print ruled lines for notebook and graph paper

CONVENIENT OPERATION PANEL & TFT COLOR VIEWER* – GREATER CONVENIENCE & CONTROL

- Operation Panel has convenient layout and is easy to operate even when scanning thick books

Only the PIXMA MX338 features a TFT Color Viewer.

Model featured: PIXMA MX328

QUICK START – READY TO WORK, RIGHT AWAY

- PIXMA MX338 & MX328 start up a few seconds after power is on
- Work more efficiently and increase overall productivity

DESIGNED TO FIT IN

- Titanium White Mirror Finish with Matte Black trim is stylish & professional
- Classic "box" design looks smart and requires less of your valuable space
- Ergonomically designed with a convenient operation panel and an ADF that folds flat

CHROMALIFE100+ – IMAGES THAT CAN LAST OVER 300 YEARS!*

- Canon's new dye-based inks and new genuine photo papers work in combination to create brilliant, fade-resistant prints that can last over 300 years!
- Improved gas fastness also enhances print longevity
- New Photo Papers expand the total color area, so photos not only last longer, they also look even better

Under proper storage conditions. See overleaf for details.

CHROMALIFE100[+] PROPER STORAGE CONDITIONS

300-year life in an album:
<Criteria for estimation>
The permanence presented above is estimated using an accelerated dark storage test designed for silver-halide photos (ISO/FDIS18909). Samples are printed with an optical density of 1.0 (each black, cyan, magenta, yellow) and kept in a controlled environment of high temperature and 50% relative humidity. The test environment is designed to accelerate colour fading. The rate of the decrease in the optical density and the rate of yellow discolouration of the paper are measured. Finally, the results are extrapolated to the length of time when a printed image is kept in an environment of 23ºC 50% RH.

30-year lightfastness:
<Criteria for estimation>
When displayed in a glass frame in a typical indoor space (estimating 500 lux / 10 hours per day) without direct sunlight. Estimates for lightfastness are conducted under the following test conditions. Light source: White fluorescent light 70,000 lux; Temperature: 24ºC; Humidity: 60% RH; A 2mm thick glass is placed on the sample with an air gap between the glass and the sample during accelerated testing.

20-year gas fastness:
<Criteria for estimation>
Estimates for gas fastness are conducted under the following test conditions: Temperature (24ºC) and humidity (60% RH) are controlled in an enviroment of mixed gases of O3, NOx and SOx. The ratio of the gases is typical to indoor air composition (O3: NOx: SOx = 3: 19: 1) with 100-times concentration in order to accelerate fading.

<Criteria for estimation of print longevity>
Estimates for image permanence are conducted using the Wilhelm Imaging Research, Inc. Endpoint criteria: Accumulated illuminance causes a monochromatic / reflective optical density loss of 20-35% (figures set respectively for each colour, starting density of 1.0). Accumulated illuminance causes a difference in colour balance of yellow, magenta and cyan (each component in composite black) of 12-18%.

<Tips>
Making your printed images last longer: Light, environmental gases, high temperature and humidity can accelerate colour fading. When displaying your photographs, avoid high intensity lighting and use glass-filtered frames. Photos stored in the dark, using archival quality albums or storage materials, will tend to last longer than photos that are exposed to light. Avoid high temperatures and high humidity to promote the image permanence of your photos.

Note: The image permanence estimates presented above may vary depending on display/ storage conditions. The expressed numbers of years estimates are the result of stimulated, accelerated tests conducted by Canon Inc. and do not represent a product guarantee.

Specifications are subject to change without notice.

*1. Print speeds are the averages of ESAT and FSOT in Office Category Test for the default simplex mode, ISO/IEC FCD 24734. (ESAT:excluding time to print the first set.)

Photo print speed is based on the default setting using ISO/JIS-SCID N2 on 4x6" Photo Paper Plus Glossy II.

Print speed may vary depending on system configuration, interface, software, document complexity, print mode, page coverage, type of paper used etc. and does not take into account data processing time on host computer.

*2. Ink droplets can be placed with a pitch of 1/4800 inch at minimum.

*3. Color document scan speed is measured with ISO/IEC FCD 24735 Annex C Test Chart A.

Scan speed indicates the time measured between pressing the scan button of the scanner driver and the on-screen status display turns off.

Scan speed may vary depending on system configuration, interface, software, scan mode settings, document size, etc.

*4. FCOT on plain paper is measured based on the test standard of ISO/IEC FCD 24735 annex D.

Copy speed may vary depending on document complexity, copy mode, page coverage, type of paper used etc. and does not take into account warming up time.

ADF copy speeds are the averages of ESAT and FSOT in General Performance Test for the default simplex mode, ISO/IEC FCD 24735. (ESAT:excluding time to print the first set.)

ADF copy speed may vary depending on document complexity, copy mode, page coverage, type of paper used etc.

*5. Black & white document fax transmission speed is based on default setting using ITU-T No.1 chart.

Color document fax transmission speed is based on default setting using Canon Color Fax Test Sheet.

Actual transmission speed may vary depending on document complexity, fax settings at receiving end, line conditions, etc.

*6. Page count is based on ITU-T No.1 chart or Canon FAX Standard Chart No.1.

*7. When printing ISO/JIS-SCID N2 pattern on 4x6" Photo Paper Plus Glossy II using default settings.

*8. When copying ISO/JIS-SCID N2 (printed by inkjet printer) on A4 size plain paper using default settings.
