

FINISH YOUR CHECK

Introducing the new leader in desktop check scanning efficiency, the Canon CR-180. It delivers five key steps are handled in a single quick process. Day after day, thanks to Canon's renowned

Five process steps: stack alignment, MICR reading, endorsement printing, scanning, and sorting.

Speed & Reliability

High-speed check scanning

With a duplex scanning speed of 180 checks per minute, the CR-180 is up to twice as fast as other compact check scanners. You can choose from among five types of black & white and grayscale scanning modes, and four levels of scan resolution (up to 240 x 240 dpi). When you're ready to start scanning, load up to 200 checks on the feed tray at once.

Smooth document feeding

Reliable feeding is absolutely crucial to efficient job completion. And that's where Canon expertise with document scanners makes a difference. The CR-180 allows

you to adjust the feed mechanism to match the thickness of your documents, which ensures that each document moves smoothly into the scanner. Duplicate forms can be fed as well, by turning off the paper separation mechanism.

Precise MICR reading

The CR-180 reads the MICR line with a high-precision Canon magnetic reader, and can also read this data simultaneously with OCR software. In addition, the Scanning Utility software lets you save MICR data in different ways: as the file name of an image, in a TIFF file tag, or in a log file for reference.

Advanced Text Enhancement

This scanning mode offers clearer black & white scans of checks printed with illustrated or light colored backgrounds. With normal scanning, such design elements may lead to images in which important information is obscured. By contrast, Canon's exclusive image processing technology detects where the letters on the page are and emphasizes them for improved visibility.

Advanced Text Enhancement OFF

Advanced Text Enhancement ON

Double feed detection

If two checks get pulled into the scanner at the same time, you'll be informed of this right away. The CR-180 can be set to detect double feeds either by the thickness or length of your documents.

SCANS QUICKLY & EASILY

ers faster throughput than any comparable scanner. And its unique, all-in-one design also boosts efficiency: ned document scanning technology, the CR-180 can be counted on for performance that's second to none.

Total Convenience

■ Built-in jogger unit

A stack of checks loaded on the feed tray can be aligned before scanning to ensure high MICR reading accuracy. And because the jogger is built-in, the CR-180 saves you the time and trouble of using a separate unit for this task.

■ Larger documents

While check scanning is its primary function, the CR-180 produces quick scans of larger papers as well. Documents can be as large as 11.8 x 23 cm (4.6 x 9.1 inches). An extendable output tray handles the extra size.

■ Easy maintenance

The CR-180 opens on the side, which makes it easy to change the imprinter's ink cartridge, clear a paper jam, or perform maintenance tasks such as cleaning the scanning glass and feed rollers.

■ Two output pockets

The CR-180 allows you to sort scanned checks into two output pockets based on information printed in the MICR line. For example, bank codes can be used to create separate stacks. Each output pocket holds 200 checks.

■ Built-in imprinter

Endorsement information can be printed on the back of checks as the pass through the scanner. Maximum character length is 48 characters.

■ Bundled software

The Canon Scanning Utility is an application software with scanning, file saving, image viewing, printing, and various other functions. The ISIS/TWAIN driver is bundled and a software development kit is ready for customizing scanner operation.
