

EOS-1D
Mark III DIGITAL

Canon
Delighting You Always

ONE MIND. ONE MISSION.

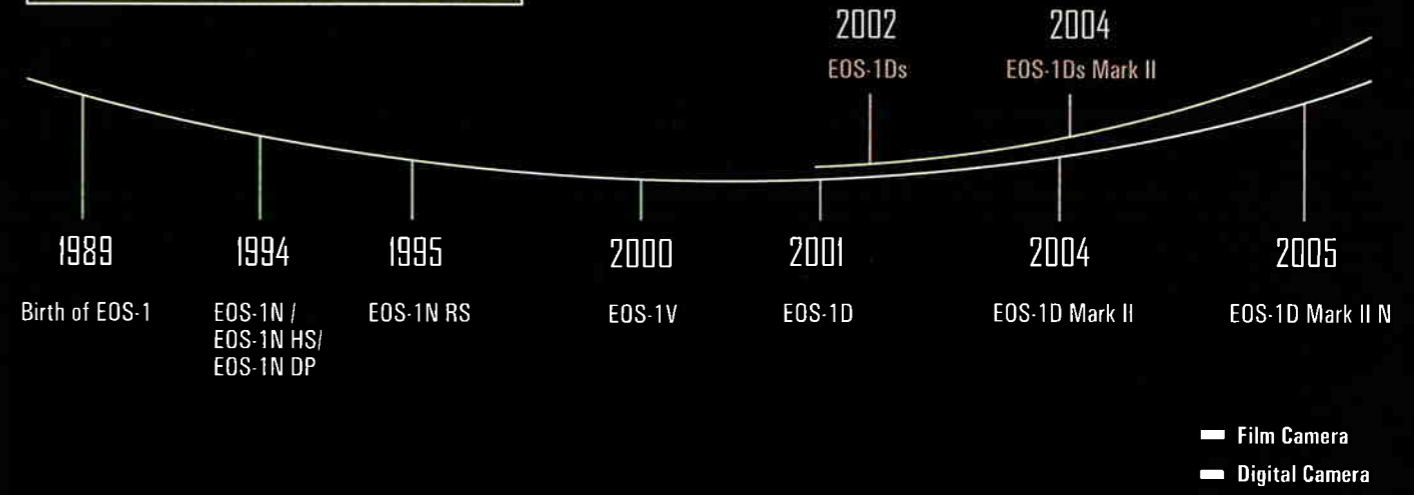

Ever since the first Canon EOS-1 analogue single-lens reflex (SLR) camera was launched in 1989, the world of photography was never the same again. With top-of-the-line features such as multi-zone metering and outstanding auto-focus capabilities, the EOS-1 was simply in a league of its own.

High levels of precision, reliability and durability characterised this camera, setting the tone for future generations of the EOS-1. And thus, a legacy was born.

The launch of the EOS-1D in 2001 marked the series' entry into the realm of digital photography. And just like its analogue predecessor, the EOS-1D revolutionised the photographic industry, making the EOS-1 name synonymous with the highest possible standards for both film and digital professional photography.

Till this day, the prestigious Canon EOS-1 line of digital SLR cameras continues its singular-minded mission - to inspire scores of professional photographers to attain photographic perfection. It is truly the undisputed mark of excellence.

EOS-1 Series Milestones

Creation is a beautiful thing. The satisfaction we get from realising something previously only envisioned in our minds' eye is nothing short of amazing. Achieving this is only possible when the photographer and his camera are at one with each other. This is what the EOS-1D Mark III digital SLR camera is all about – one camera, one mind, one mission. All tuned to perfection.

EOS-1D Mark III DIGITAL

10.1-Megapixel CMOS Sensor

The EOS-1D Mark III uses an APS-H size CMOS sensor with approximately 10.1 effective megapixels to give you high-resolution images with fine detail and natural colour reproduction.

Dual "DIGIC III" Imaging Processors

For the first time, the EOS-1D Mark III employs not one, but Dual "DIGIC III" Imaging Processors for ultra-fast processing speeds and superb camera function responsiveness.

10 Frames Per Sec. Continuous Shooting

With an astounding 10 frames per second continuous shooting capability, nothing is too quick for the EOS-1D Mark III to capture, making it perfect for action or sports photography.

As the latest member of Canon's flagship EOS-1 line of SLR cameras, the EOS-1D Mark III is the result of years of constant development and fine-tuning, finally evolving into the technological innovation that it is today.

With a prestigious history of photographic excellence behind it, the EOS-1D Mark III inherits all the experience and ingenuity of its predecessors and

combines it with tomorrow's technology and cutting-edge features, resulting in a camera that sets new standards in digital SLR photography.

If capturing beautiful and flawless images is what you truly aspire, then the EOS-1D Mark III is the perfect camera for you. Welcome to a new era of digital photography.

Precise 19-Point Cross-Type AF Sensor

The EOS-1D Mark III features a 45-point AF system consisting of 19 cross-type AF point (f/2.8) and 26 Assist AF points for extraordinary focusing precision.

EOS Integrated Cleaning System

Using a comprehensive approach to tackle dust generation, Canon's ground-breaking EOS Integrated Cleaning System reduces the effects of dust to give you crystal clear images.

300,000 Cycle Shutter Durability

The EOS-1D Mark III has recorded a 300,000 cycle shutter durability for utmost reliability in camera performance.
